The **highest** standards.
The **happiest** customers.

tempbuddy™

Don't take our word for it.

Great things people say about us.

We use TempBuddy on a day-to-day basis in order to manage both client and candidate expectations. **The check-in and out system allows candidates to notify when they begin and finish their placements. This has been hugely beneficial in tracking punctuality and managing client expectations.** As the app updates in real time we are able to track if candidates are late/early for shifts. This has given us the opportunity to pre-empt difficult conversations with clients and notify them a candidate is currently running late and what time they should arrive by- constantly keeping them updated.

> ***One of the main benefits of the system has been the effective use of the app's checking in and out system.***

The timesheet and invoicing systems are highly streamlined. Timesheets are synchronised with the check-in/check-out system, meaning they will automatically update depending on the hours a candidate has recorded. If hours need to be amended they can be easily edited at the end of each week by either candidate, client or consultant before final approval. The data recorded on the timesheet is then used to generate invoices and payslips for clients and candidates respectively. This presents clear and precise information regarding hours/dates worked, pay rates and charge rates.
From a personal point of view the facial recognition feature has also been of great benefit. Working solely with clients in the education sector **the facial recognition feature offers extra security and safeguarding to our clients.**
Before using the system full training and advice was given on all aspects of the TempBuddy software. We were provided with detailed and interactive training sessions that give us the opportunity to explore the system as we learned. Any further training that was required was tailored and quickly arranged. New starters have also been given quick and efficient training with previous clients.

Client, Paul Gibson,
Recruitment Consultant SchoolImprovement Liverpool

We are a Dublin based recruitment agency providing permanent and temporary staff. The temporary staff we have on our books are typically for longer term assignments (greater than 3 months) and historically timesheets would have been submitted weekly, fortnightly or monthly (fax and email).

> ***Overall, we would highly recommend, easy to use and our experience with the software and TempBuddy has been very positive.***

We have been using TempBuddy for over three months, **overall experience has been great, the roll-out to the agency workers was simple and straightforward, clients embraced and it saves a lot of time for us.** The software allows us to download a CSV file for importing in our payroll package, couldn't be easier. It is also gives us a competitive advantage when promoting our recruitment services and reconnecting with previous clients.

Client, Peter Hughes,
Managing Director Principle

“

TempBuddy is an incredible product in the market– the best
I have seen in recruitment terms and I have seen a few!

Speaker, Ryan Williams
CEO, Connected Talent

“

We are excited to announce that we are using TempBuddy.
Very exciting times ahead, and our clients are already wowed by it!

Client, Peter Barry
Managing Director, Brompton Recruitment

“

I think what you are doing is far greater
than selling software!
